DETAILED ACTION

Claim Rejections - 35 USC § 102 and § 103

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 27-47 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over JOHNSON et al. (5,411,647).

The reference's invention is directed to a method of reducing the settle timing time of an electrochemical sensor having one or more electrodes. The reference discloses in col. 4, lines 60-67 an electrode is electroplated with Pt-black and then electroplated with glucose oxidase. As such the claimed product is anticipated by the teachings of the reference.

In the event of any difference between the prior art's product and the claimed product, since the above claims are drafted in a "product-by-process" format, how the claimed product differs from the product disclosed in the applied reference(s) is not apparent. It is well settled that the determination of the patentability of a "product-by-process" claim is based on the product itself, and the product is unpatentable if it appears to be the same as, or slightly different from the prior art products. *In re Brown* 173 USPQ; *In re Thorpe* 227 USPQ 964.

As to the subject matter of claim 28, the selection of any conductive material for the electrode would have been within the level of ordinary skill in the art.

Double Patenting

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

5. Claims 48 and 49 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 26 of U.S. Patent No. 6,340,421 in view of COLUMBUS (4,302,313). The patent's claim claims an apparatus for depositing an electroactive species onto an electrode which comprises all the structures (a)-(c). The difference between the patent's claim and the above claim is the provision of the recited conveyor. COLUMBUS shows in an electrode-containing device with capillary transport between electrodes the provision of a conveyor (Fig. 21). The subject matter as a whole would have been obvious to one having ordinary skill in the art at the time the invention was made to

have modified the patent's claim as shown by COLUMBUS because the provision of mechanical means or automatic means to replace manual activity has been held to be obvious. *In re Venner* 120 USPQ 192.
